MUNCHI

An imaginary cookie dough mixer that stores the ingredients and mixes the desired flavor at the press of a button.

Enjoy the programmed cookie flavors or load in your own secret family recipe!

Munchi is the innovative new way to whip up homemade cookie dough whenever you want. Simply load up the ingredients to store within the cones along the back, press the flavor of cookie dough you want and your dough will be ready!

Store ingredients here. They magically pop out to be filled with ingredients. Load up normal ingredients like flour, sugar, and eggs in the challenge-friendly supermarket.

Once these dots are all lit up, the dough is ready to bake or eat raw if you chose the ugliest option.

The bowl spins to effectively mix all the ingredients and is easily removable for cleaning.
